PROFESSIONAL EXPERIENCE

Netflix

Machine Learning Engineer

Los Angeles, CA

July 2025 - Present

- Played key role in architecting ML inference pipeline for InterPositive (\$600+ acq.)
- Published novel ML research papers into top journals (CVPR 2026)

Amazon

Software Developer Engineer Intern (Ads, Sponsored Brands Video)

Seattle, WA

June 2024 - August 2024

- Lead the migration of a business-critical ad-creation service to Native AWS
- Managed discussions with dependent teams across ad organizations.

Amazon

Software Developer Engineer Intern (Ads, Sponsored Brands Video)

Seattle, WA

May 2023 - August 2023

- Conducted research, development, and testing of Fast Fourier Transform-based blurriness detection algorithms using Python and OpenCV.
- Created an entirely new AWS Lambda-backed API deployed through CDK bringing the aforementioned algorithms into production. (API Gateway, Docker)
- Played a key role in enhancing performance of video advertising pre- moderation

Oliver Space

Software Engineering Intern

San Francisco, CA

May 2022 - August 2022

- Developed internal tooling for customer experience.
- Won internal hackathon by redeveloping website experience (React.js, Vue.js).
- Contributed to backend logistics codebase (Ruby on Rails).

EDUCATION

University of Pennsylvania

Bachelor of Applied Sciences, Computer Science

Philadelphia, PA

Minor in Engineering Entrepreneurship

August 2021 - July 2025

GPA: 3.7/4.0, Penn Quant Trading Club (Advanced Team)

Andrée English School

High School Diploma

Santiago, Chile

GPA: 6.9/7.0

PROJECTS AND COMPETITIONS

Zeptaframe Editor (based on Go-with-the-flow paper)

- Developed first AI video generation platform that allows full subject motion control with drag and drop interface
- Implemented state-of-the-art video generation video model fine-tuning techniques and video captioning, allowing video generation without text input
- Undergraduate research project that landed me a job at Eyeline Labs (Go-with-the-flow authors)

Robotics

Recruited by a joint team from top Chilean universities to participate in Tokyo two times.

Valparaiso, Chile

- 2x Gold Medal, Competencia Robótica UTFSM
- 21st Place, All Japan Micromouse and Robotracer Contest (WW)
- 57th Place, All Japan Micromouse and Robotracer Contest (WW)

Tokyo, Japan

Trading Bot

- Created a periodic portfolio rebalancer using Wharton Research Data Services, TD Ameritrade API, and Python.

Open-Source Wireless Laser-Gate Track & Field Timing System

- Created ultra-affordable wireless timing system for T&F athletes and coaches. Published all code, PCB designs, 3D designs for free on Hackster.io. Project was very well received by the local and online community.

Mathematics Olympiad

- Gold Medal, Universidad San Sebastián.

ADDITIONAL SKILLS

- Proficient in Python, Java, C++, Javascript (React, Vue), PCB Design, Embedded Systems, 3D Modelling, Welding
- Fluent in English and Spanish
